

Gonorrhea And Chlamydia (STD)

The physicians at Stark Women's Center are dedicated to providing the best possible preventative care to their patients. They have generally accepted and adopted the Gonorrhea and Chlamydia screening tests as a part of the standard of care for the yearly visit.

Gonorrhea and Chlamydia are sexually transmitted diseases which can be treated. A person can be infected with either of these diseases without having any signs or symptoms. These tests may be performed today on patients under the age of 25 who are or have been sexually active. If you have any questions about Gonorrhea or Chlamydia, please ask your health care provider.

This letter is to inform you, the patient that your insurance company may not pay for these tests as a part of your yearly preventative care. The estimated cost of these tests is \$226.00. By signing below you are stating that you have been informed of the Gonorrhea and Chlamydia testing and may be responsible for the balance due.

I accept testing, _____

I decline testing, _____
