CONSENT FOR GYNECOLOGICAL ULTRASOUND

Your physician has recommended that you have a transabdominal and/or transvaginal ultrasound examination. This is a high frequency sound wave test that involves no radiation. This procedure is ordered when there are specific indications, which require further evaluation of the pelvic organs.

This exam will be performed by a registered ultrasound technologist. Diagnostic ultrasound has been used for over 25 years. Based upon information generally available to the profession and to your physician, no confirmed biological effects on patients or technologists caused by exposures at intensities typical of present day equipment is known by your physician to have been reported.

I consent to this procedure based solely upon the information provided above.
